# Urban Farming

**635 farms producing over 3 million kilos of vegetables per year**

The background of the slide is a faded, light blue-tinted photograph of a city street. On the left, there is a large, ornate fountain with water spraying upwards. In the center and right, there are several multi-story buildings with many windows. The overall scene is bright and somewhat washed out, serving as a backdrop for the text.

**It is important to stress that intelligent cities are first and foremost about people, specifically about improving their lives in the most efficient way possible.**
