## Disaster Resilience

Globe provides its customers more than just connectivity, whether in an urbanized, rural, or far flung areas in the Philippines. We offer **solutions and services** to our LGU partners **that will equip them in mitigating the effects of natural calamities and the imminent threats of climate change.**

Supply useful **INFORMATION** through digital technology using environmental sensors and drone equipped with video surveillance analytics (VSA). They further modernize the intelligent cities or provinces.

**CONNECTIVITY** to bridge digital divide to the far flung areas and disaster stricken communities

Offer different tools for **COMMUNICATIONS** as a tool to disseminate news, advisories and alerts

# CALF - COW AT A LESSER FOOTPRINT

An innovative and derivative technology solution from its parent, COW. It provides temporary Mobile communication services include voice, SMS and mobile data.

# SATELLITE CONNECTIVITY

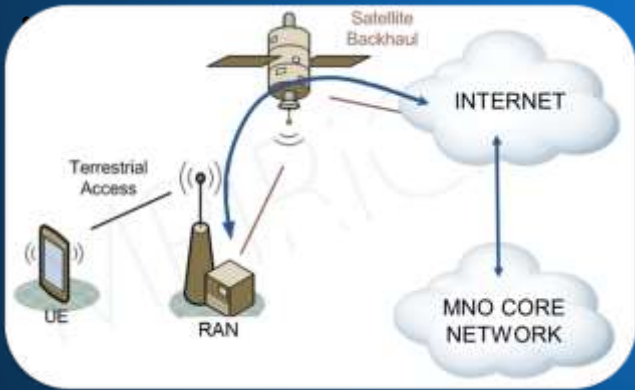

**Non-terrestrial network (NTN) that augments cellular services especially in far flung areas with rugged terrains**

**Quickest way to provide the cellular service for worst disaster cases.**

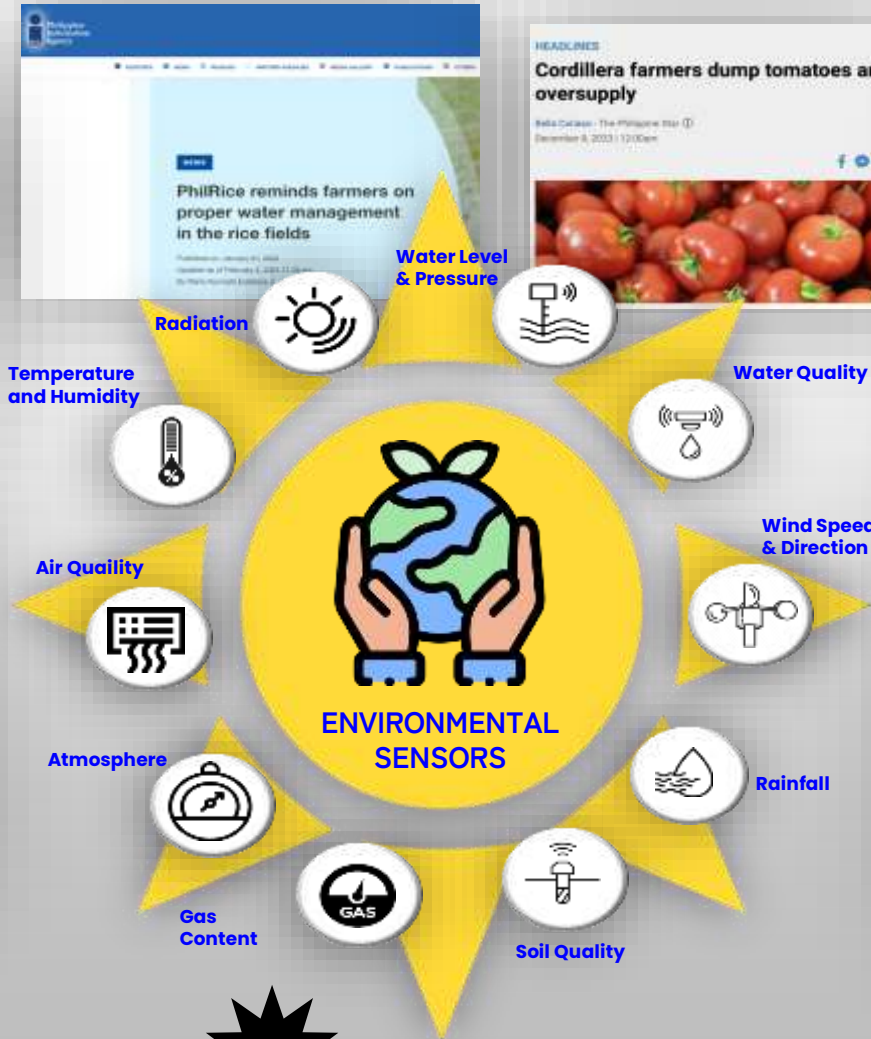

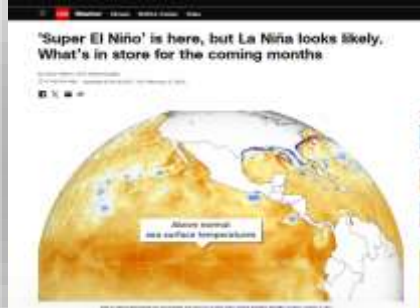

**Services include voice, SMS and data**

## Satellite Used As A Backhaul

## Direct to Phone Satellite Connectivity for the worst disaster cases

### **SURVEILLANCE & MONITORING**

Object and human recognition for monitoring & security

Inspection to identify defects and damage in bridges, power lines & buildings beyond human reach

Security & Surveillance to monitor crowds, identify potential security threats and provide situational awareness to law enforcement.

### **EMERGENCY MEDICAL RESPONSE**

Provides emergency medical response and supplies in hard-to-reach areas, especially during natural disasters or in remote locations.

### **EMERGENCY RESPONSE**

Deployed during natural disasters or emergency cases to assess damage, locate survivors, and provide situational awareness to emergency responders

## **DRONE TECH**

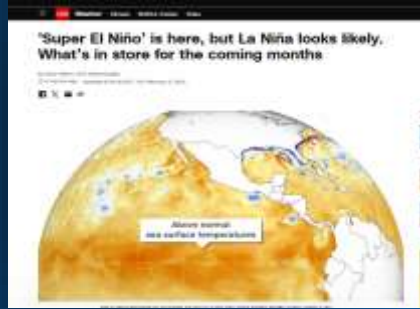

### **WILDLIFE CONSERVATION**

Track & monitor wildlife population to support conservation efforts in protecting endangered species.

Provides high-resolution map of wildlife habitats to conservationists to inform them of land use decisions

Track poachers and protect wildlife from illegal hunting.
