

Livable Cities

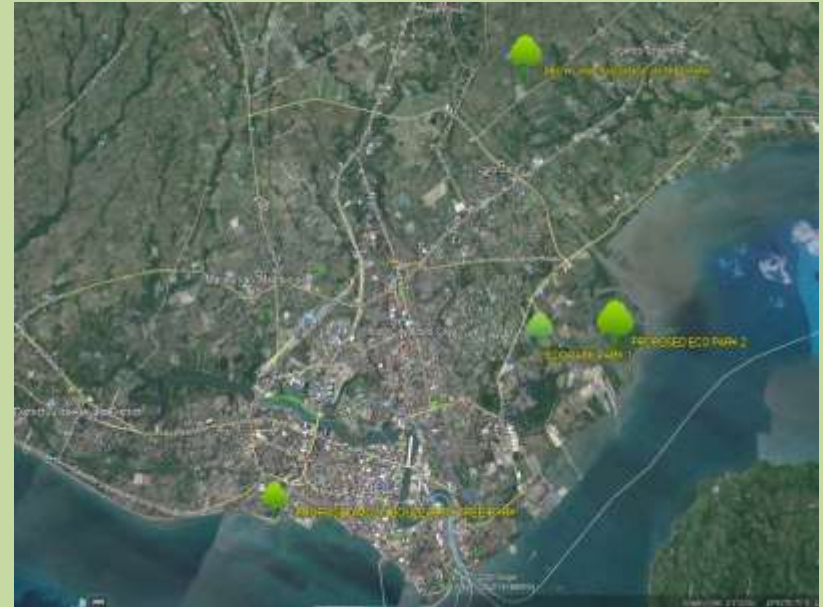

**Green Buildings
and Open Spaces**

One of the top tourist destinations in the country

ILOILO CITY

home to Ilonggos who face the risks brought by natural and human-induced hazards due to the geographic location including its social vulnerabilities.

ILOILO BEACH FOREST

a 3-hectare project will be implemented in partnership with Department of Environment and Natural Resources (DENR) and Department of Public Works and Highways

ILOILO CITY TREE PARK

in Lanit, Jaro a 3-hectare tree park with endemic/native/local trees

GREEN TUNNELS

along the bike lanes in Diversion Road

Mini-forests in subdivisions' open spaces

- ❖ Gran Plains
- ❖ Alta Tierra
- ❖ Ledesco
- ❖ Puerto Real

Mangrove Eco Park

a 35-hectare mangrove forest will be developed with the support of project partners Department of Environment and Natural Resources and Global Business Power Corp

We have accentuated “Environmental Management” in the roadmap we are using as guide. It has rationalized Esplanade operations, improved all plazas, and initiated closer engagements with DENR, and other stakeholders for our waste management program.

We have always put premium in collaborating with partners because I believe that it is only when the LGU and the private sector work harmoniously together that we can maximize our potentials in creating progressive, green, and sustainable communities.

**THANK
YOU !**
