

# **SUSTAINABLE CITIES SUMMIT:** Building Liveable Cities

Building local competitiveness is critical to enhancing long-term national competitiveness

## The Need for Liveable Cities

- Cities are primary drivers of economic growth and innovation
- Cities are hubs of population, consumption, resource use, and waste
- Cities are generators of wealth, production, and development
- When people think of where to live, work, invest, and visit – they think of Cities.

## The Need for Liveable Cities

- Today's cities are facing new challenges. They have become the center of society's most pressing economic, social, and environmental issues
- They face issues on disaster preparedness, traffic congestion, lack of mobility and logistics options, delivery of public goods and services, etc.
- We need to plan them better.

# Benefits of Creating Competitive Cities

- **Diversification of investment and job opportunities**
- Creation of **new wealth**
- **Growing middle class** in different parts of the country
- **Overall attractiveness** of the country as an **investment site**
- **Inclusive Growth**
